Release Notes from Zhiqiang Jiang
EchoSight-Pro latest version 0.1.0

EchoSight-Pro version 0.1.0

Some big change in calculation updated;
Some performance improvements;
Some bugs fixed;

EchoSight-Pro version 0.0.3

MLA and Synthetic supported for linear probe in CPU only mode;
Focus calculation updated;
Sound field calculation updated;
Basic gain control model added in;
Some bugs within beam forming fixed;

EchoSight-Pro version 0.0.2

Huge milestone for EchoSight-Pro.
Linear probe workable and achieved amazing performance in new framework. The complete chain processing data rate on CPU only settings has defeated old framework EchoSight GPU only mode (old EchoSight performance at early-stage) already!

EchoSight-Pro version 0.0.1

Initial version tag of EchoSight-Pro.
The whole complete rewrite of the framework, data chain initial workable first-time status. No release to public.
